**What does Mah mean on a solar battery?**

A higher mAh number means the battery can store more energy. For instance,a 2000 mAh battery can supply a current of 2000 milliamperes for one hour before being depleted. You can also think of mAh as a gauge of how long your solar battery can last under a specific load. The mAh rating plays a vital role in determining the runtime of your devices.

**How does Mah affect solar battery performance?**

Understanding mAh directly influences how effectively your solar battery performs. The mAh rating essentially indicates the battery's energy storage capacity, impacting runtime and efficiency. Higher mAh means more energy storage. For instance,a battery rated at 2000 mAh can provide 2000 milliamperes of current for one hour.
