What types of LED displays are used in shopping malls?

Shopping malls today feature a variety of LED displays, each designed to meet specific advertising needs and enhance the customer experience. From large outdoor screens to creative, interactive indoor displays, the options are vast. In this chapter, we'll explore the key types of LED displays commonly used in shopping malls.

What is a shopping mall LED screen?

Shopping mall LED screen plays a key role in enhancing the retail environment. By selecting screens with superior clarity, durability, and energy efficiency, mall managers can significantly attract potential customers and boost business success. Linstar is committed to delivering cutting-edge solutions tailored to demands of modern shopping spaces.

Why do malls have a large viewing range?

It ensures timely promotions, events, and product displays across multiple screens from a central location. A large viewing range guarantees that content remains clear from different locations within the mall, allowing all visitors--whether passing by or lingering nearby--to see the display easily.
