-----  
What is a 120kW DC charging pile dual port?

The 120KW DC charging pile dual port is suitable for large vehicles with a power of 90-180 degrees Celsius (mainly referring to mud trucks, buses and logistics vehicles). When working with a single port, the output can be up to 120 kw, and when working with two ports, each 60 kw, with a conversion efficiency of 96% or more.

How many kW can a 120kW charging pile output?

When working with a single port, the output can be up to 120 kw, and when working with two ports, each 60 kw, with a conversion efficiency of 96% or more. The 120KW fast DC charging pile double port mainly consists of a human-computer interaction unit, a control unit, a metering unit, and a safety protection unit.

How much power does a BP charging cabinet have?

With the modular structure, a single cabinet offers power from 150 kW to 300 kW. The combined cabinets can consist of 3-4 cabinets up to 1200 kW. If there's a need to scale up your charging application, we can go even higher. Zhonhen has become the only Chinese domestic supplier of BP company since August 2019.

What is Zhonhen power module cabinet?

The combination of smart CPUs and power modules provides 30-1200KW charging capabilities. A maintenance toolset is available for real-time monitoring and easy maintenance. Zhonhen Power Module Cabinet is a modular and scalable fast-charging cabinet for electric cars, electric commercial vehicles, and electric off-highway vehicles.

Product Description: DC charging pile is a kind of charging equipment specially designed to provide DC power supply for electric vehicles. DC charging pile can convert AC ...

Intermittency of Renewable Energy: Solar and wind power fluctuate, making it difficult to ensure a consistent
