Our expertise spans HV interconnection substations, MV distribution systems, and full-scale data center infrastructure, ensuring seamless integration, scalability, and operational efficiency.

Power plant EPC by USP& E offers clients over 20 years of energy industry experience. Our EPC team delivers accurate EPC contracts for all power projects. Experience excellence with USP& E.

Register here for a free webinar on the findings from this report, and the companion report Insights into Scaling Virtual Power Plants. Authors will discuss findings from both ...

From electrical systems and power supply mechanisms to natural air-cooling capabilities, from robust security features to advanced environmental monitoring systems--it's all here, ...

Design GaN-based DC/DC converters for your data center applications to improve power usage efficiency & see why EPC GaN products are the ...

Project Hestia will make distributed energy resources -- including residential rooftop solar, battery storage, and virtual power plant-ready, consumer-facing software -- available to more ...

This is the list of 2024 Top Solar Contractors that primarily perform engineering, procurement and construction (EPC) work. These companies chose their primary service as "EPC" when ...

Data Center Project Case Study Greenfield data center facility at Navi Mumbai 16 Data Halls X 1080 KW Highly resilient and scalable facility with 32 MVA of Grid Power Mission critical ...

In February 2025, gas provider Energy Transfer announced a long-term supply agreement with Denver-based
