-----

Brookfield Renewable has proposed a 161MW/644MWh battery storage system to compete in an Ontario grid operator Request for Proposals.

Renewable energies, i.e. primarily wind power, geothermal energy, biomass and solar energy, are inexhaustible sources of energy. They represent an important alternative or addition to fossil ...

Paris, March 26, 2025 - On the occasion of Patrick Pouyann's participation in the Europe 2025 conference in Berlin, and in connection with the ...

South Korea's Tilda accelerates its entry into Vietnam with an artificial intelligence-based energy optimisation solution for solar and energy storage systems in the manufacturing sector.

These interviews explore energy storage business cases across the EU, demonstrating that these projects are viable, profitable and essential to achieving Europe's ...

How do hybrid renewable energy projects work? The most common form of hybrid project is combining wind or solar power plants with battery energy ...

Wisconsin Public Service (WPS) and We Energies filed plans with the Public Service Commission of Wisconsin this month to build five new large-scale renewable energy ...

Energy storage systems are an integral part of Germany's Energiewende ('Energy Transition') project. While the demand for energy storage is growing across Europe, Germany remains the ...

The German company ABO Wind designs and develops systems for generating electricity from renewable

energies. In 2023, a solar park was built in Bavaria. To ensure ...

Berlin has emerged as a hotspot for energy storage innovation, blending sustainability goals with cutting-edge technology. This article explores the key players, projects, and trends shaping ...

Swedish public utility Vattenfall will soon start filling a 45m-high, 200MW-rated thermal energy storage facility in Berlin, Germany.

During sunny and windy phases, wind and solar park operators have to throttle or even shut down their systems repeatedly to avoid overloading the power grids. This resulted in redispatch ...

Q Energy's portfolio includes a strong emphasis on wind energy, with both onshore and offshore projects being integral to their operations. They also ...

This growth highlights the importance of battery storage when used with renewable energy, helping to balance supply and demand and improve grid stability. Energy ...

Berlin, Germany - On June 25, 2024, Berlin unveiled its latest solar power plant, marking a significant step in Europe's renewable energy efforts. The new facility, located on ...

Explore how Europe's BESS landscape is transforming with significant developments in battery storage capacity. Learn about the key players and countries leading ...

Invenergy is an American-based multinational power generation development and operations company. The company develops, builds, owns and operates power generation and energy ...

The Berlin power storage project aims to solve two headaches at once: storing excess solar/wind energy and keeping the grid stable during those gloomy German winters.
