Which Bess systems are installed in Vietnam?

Some medium-sized BESS systems installed in Vietnam The BESS system at the PECC2 Innovation Hub was the largest BESS system in Vietnam at the time it began operation in 2021, reflecting PECC2's pioneering vision and role in mastering energy storage technology applications.

How much does a Bess system cost in Vietnam?

In 2023, EVN PECC3 estimated that the cost for a 2 MWh BESS system was 360-420 USD/kWh, and that the investment would require electricity prices in Vietnam above 18 UScent/kWh to be profitable - this is twice the current levels. However, BESS costs are declining rapidly.

What is the current state of Bess in Vietnam?

The Current State of BESS in Vietnam As of 2024, Vietnam has practically no BESS installed. So far, only private renewable power projects have trialed BESS development, there is nothing at the utility scale. The largest electricity storage project in Vietnam is the Bac Ai Pumped Storage Hydropower Project.

Why is Bess important in Vietnam's energy transition?

Regulatory Landscape The Vietnamese government has recognized the importance of BESS in the country's energy transition. The revised National Energy Policy includes new incentives for BESS installations, such as tax credits and subsidies, which are aimed at accelerating the adoption of energy storage solutions.

Whether you're a homeowner in Hanoi, a solar EPC in Ho Chi Minh City, or a telecom integrator in the Central Highlands, GSL ENERGY has a storage solution for you.
