Who owns the energy sector in Bhutan?

Bhutan's energy sector operations have separate commercial management and ownership from the government. The state-owned Druk Green Power Corporation(DGPC) owns and operates power plants while the Bhutan Power Corporation,also state-owned,performs transmission and distribution.

How can Bhutan improve its energy security?

To improve Bhutan's energy security while strengthening resilience to water variation and climate change,it is required to diversify power generation sourcesand types,including (i) solar farms,rooftop and floating solar, and agrivoltaics; and (ii) storage and pumped storage hydropower and small hydropower. 4 H. Nagai et al. 2017.

How will solar and wind projects help Bhutan?

The introduction of solar and wind projects helps Bhutan stabilise supply throughout the year. The 500 MW Reliance solar farm and local solar-wind installations like those in Sephu and Rubesa will cover winter shortfalls and reduce the need to import power during dry months.

What is Bhutan's energy policy?

According to the National Energy Policyreleased in June 2025,Bhutan aims to expand its total installed capacity to 25 GW by 2040 -- 20 GW from hydropower and 5 GW from solar and wind. This strategy focuses on balancing export-oriented hydro projects with localised renewable generation to ensure year-round energy security.

The expansion of Moss Landing Energy Storage Facility in California, already the world""s biggest BESS project, to more than 3GWh was one of the highlights of the first half of ...

With the expanding introduction of renewable energy sources and advances in semiconductor and energy
