A manufacturing hub that never sleeps, where robotic arms dance to the rhythm of renewable energy. Welcome to the new era of industrial park energy storage - where factories are ...

The world's first 300-megawatt compressed air energy storage (CAES) demonstration project, "Nengchu-1," has achieved full capacity grid connection and begun generating power in ...

CATL plans large-scale sodium-ion battery deployment in 2026 for swap systems, EVs, and energy storage. Its Naxtra cells offer up to 175 Wh/kg energy density, -40 °C ...

[Shenzhen, China - October 2025] - China has officially completed its first 100 MWh sodium-ion battery energy storage station, marking a milestone in the nation's clean-energy transition and ...

This project opened on June 30, 2024, with battery cells supplied by Zhongke Haina, making it the largest sodium-ion battery energy storage system in the world.

In June 2024, a 100-megawatt-hour sodium-ion energy storage project began operation in Hubei province, representing the first large-scale commercial use of sodium-ion ...

A new energy storage plant featuring sodium- and lithium-ion batteries has opened in China's Yunnan province. The energy storage station, operated by China Southern Power ...

Your smartphone can't store electricity (yet), but the global energy storage sector is doing it at an industrial scale that would make even Tony Stark jealous. The storage power ...

Let's face it - lithium has hogged the spotlight in energy storage for years. But 2024 marked a turning point:

China sodium energy storage new energy storage cabinet

sodium ion batteries are no longer the "understudy" but a lead actor in ...

"Our industrial and commercial energy storage cabinets fully utilize the high safety and wide temperature range characteristics of sodium-ion batteries. They can discharge ...

This isn't sci-fi - it's the reality battery energy storage systems (BESS) are creating. As of 2025, China's installed new energy storage capacity has already surpassed 61.91 GW, enough to ...

Move over, lithium--there's a new player in town shaking up the energy storage game. Sodium-ion batteries, the new energy storage system on the block, are making waves ...

China's first large-scale lithium-sodium hybrid energy storage station has been put into operation, capable of powering hundreds of thousands of homes, as sodium-ion batteries ...

Let's cut to the chase: China just flipped the script on renewable energy storage with its first sodium battery energy storage station. If lithium-ion batteries are the overpriced ...

The power station is China's first 100 MWh-level sodium-ion energy storage project, marking the sodium-ion battery sector's entrance into a new commercialization stage.

China launches world's first grid-forming sodium-ion battery storage plant The Baochi Storage Station in Yunnan integrates lithium and sodium-ion technologies at scale, a ...

The 10-MWh sodium-ion battery storage station was put into operation on May 11 in Nanning, Guangxi in southwestern China, China Southern Power Grid Energy Storage, the ...

On May 25, China's first large-scale lithium-sodium hybrid energy storage station -- the Baochi energy storage station developed by CSG -- was officially put into operation in Wenshan ...
