What is the South-East Asian aviation infrastructure market?

The South-East Asian Aviation Infrastructure Market is segmented by Airport Type (Commercial Airport and Military Airport), Infrastructure Type (Terminal, Control Tower, and Other Infrastructure Types), and Country. Need a report that reflects how COVID-19 has impacted this market and it's growth?

Which countries have the most airport projects in Asia Pacific?

Asia Pacific leads in the number of airport projects and investment committed to existing and new airports. Six of the top 10 airport projects at existing airports in Asia Pacific are in China. The largest projects at existing airports are in Europe - London Heathrow Airport - and in Asia Pacific - Hong Kong International Airport.

How will new airports help South-East Asia's tourism sector?

The total fleet size of South-East Asian commercial airline operators is anticipated to witness a three-fold growth by 2039. Thus, the development of new airports in the region would be critical to foster the booming tourism sector.

How much do airport projects cost in China?

It may be worth looking specifically at China, where there are known to be 25 projects at existing airports, valued at USD68 billion, which is over one third of the entire expenditure in Asia Pacific. The first 14 of those projects are valued at over USD1 billion.
