What is the European Commission doing about energy storage?

The European Commission in 2020 published a study on energy storage, which summarized some previous studies and reports, explored current and potential energy storage markets in Europe, and set out policy and regulatory recommendations for energy storage.

What is the European energy storage inventory?

In March 2025, the Commission launched the European Energy Storage Inventory, a real-time dashboard that displays energy storage levels across different European countries. It is the first European-level tool of its kind and offers energy storage data across a full range of technologies.

Why should you join energy storage Europe Association?

Featuring in Energy Storage Europe Association's publications and events, such as the Energy Storage Global Conference, gives you visibility and the opportunity to strengthen your network among storage experts. European Commission published the Battery Booster Strategy as part of the European Automotive Action Plan.

Which countries are pioneering large-scale storage solutions?

Countries like Germany, Denmark, and Sweden are pioneering large-scale storage solutions that integrate seamlessly with their expanding renewable energy networks. The European Union's commitment to energy independence and sustainability has catalyzed groundbreaking projects across the continent.

Minsk energy storage transformation Energy storage is a potential substitute for, or complement to, almost every aspect of a power system, including generation, transmission, and demand ...
