How many solar panels does a Dutch House need?

The number of solar panels needed for your home also depends on a few factors, including: The average home installation falls between 10 to 12 solar panels, which would partially power the average Dutch house with solar energy. Solar panels can cover your entire roof in the Netherlands, depending on your energy needs.

Should you install solar panels in the Netherlands?

Another reason to consider installing solar panels in the Netherlands right now is that the Dutch government will actually foot part of the bill. Currently, the Dutch government is offering a sustainable energy investment grant (ISDE) to compensate for the cost of energy-saving and sustainable installations.

How much do solar panels cost at Coolblue energy?

At Coolblue Energy, you pay EUR 17.50 per month. How much you pay exactly differs per energy supplier. You do still earn back your solar panels with these costs than a couple of years ago. Are solar panels still worthwhile with feed-in costs?

What is a solar netting scheme?

The netting scheme (salderingsregeling) is an arrangement where you can earn money for the excess energy your solar panels generate. When solar panels generate electricity, it enters the electricity net and is sold to your energy provider rather than going directly into your house.

For a roof with 10 solar panels, you pay EUR 4408 to EUR 5714 on average in 2025, which you earn back within 4 to 6 years. What your exact investment and payback period are, ...
