Can Dodoma generate enough solar and wind energy?

Workers install new solar panels. Dodoma has potential to generate enough solar and wind energy. PHOTO | FILE In 1907 a small town, named Idodomya, was built in the land of Wagogo by the German colonists. It was a midway hub as they were building the central railway in German East Africa, and now independent Tanzania.

Can solar power make Dodoma a green city?

For Dodoma region, there is adequate sunshine for solar power and adequate wind, for wind power, which can run our capital city, and make the nation proud for being truly a green city. Sometimes back in 2017, I wrote in this column that it was important to encourage households across the nation to use solar power.

Why is there a power shortage in Dodoma?

Also there is power shortage because most of the power from the national grid is hydro-generated. For Dodoma region, there is adequate sunshine for solar power and adequate wind, for wind power, which can run our capital city, and make the nation proud for being truly a green city.

What is Dodoma City?

We are talking about Dodoma City in Dodoma Region, which geographically speaking is at the centre of our nation. The semi-arid region suffers low and erratic rainfall, and it has only a single rainy season in a year between November/December and April/May. Why do I have this city in mind?
