A battery manufacturer has selected Kentucky for a nearly \$712 million project to produce industrial-sized batteries used to store and ...

The MIT Energy Initiative's annual research spring symposium explored artificial intelligence as both a problem and solution for the clean energy transition.

1. Energy storage battery factories in Jiangxi are pivotal in the manufacturing landscape, driven by rapid technological advancements and a rising demand for renewable ...

Battery factories need specific width and height dimensions to accommodate cell production lines, said energy storage analyst Ravi Manghani, who tracks the industry's supply ...

Tesla Gigafactories represent a global revolution in battery production, with far-reaching implications for the automotive, energy, and...

As MIT's first vice president for energy and climate, Evelyn Wang is working to broaden MIT's research portfolio, scale up existing innovations, seek new breakthroughs, and ...

Unlocking its secrets could thus enable advances in efficient energy production, electronics cooling, water desalination, medical diagnostics, and more. "Boiling is important for ...

Giving people better data about their energy use, plus some coaching, can help them substantially reduce their consumption and costs, according to a study by MIT ...

The new Schmidt Laboratory for Materials in Nuclear Technologies (LMNT) at the MIT Plasma Science and Fusion Center accelerates fusion materials testing using cyclotron ...

In MIT course 15.366 (Climate and Energy Ventures) student teams select a technology and determine the best path for its commercialization in the energy sector.

About AESC Group: AESC Group is a global battery technology company headquartered in Zama, Japan, and committed to research, development, design, manufacturing and sales of ...

Taiwan's Innovative Green Economy Roadmap (TIGER) is a two-year program with the MIT Energy Initiative, exploring ways that industry and government can promote and adopt ...

The U.S. battery supply chain just got a little stronger. LG Energy Solution, a division of the major Korean battery manufacturer, is ...

At the MIT Energy Initiative's Annual Research Conference, speakers highlighted the need for collective action in a durable energy transition capable of withstanding obstacles.

Liquid air energy storage could be the lowest-cost solution for ensuring a reliable power supply on a future grid dominated by carbon-free yet intermittent energy sources, ...

Battery factories are popping up across North America. Here's where they are and how the Inflation Reduction Act influenced the boom.

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed ...
