Battery storage. In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already ...

Explore the Future of energy storage--discover key technologies, market trends, and innovations powering the clean-energy transition.

Executive Summary Data Center Energy Storage Industry Insights Report data center industry continues to evolve, energy storage remains a critical focus, shaped by shifting ...

Due to the acceleration of the global energy transition, energy storage has become a new focus for the energy sector. In the medium to long term, the growth of global energy ...

Storage installations will grow just under 30% in 2024, but between 2025 and 2028 an annual average growth rate of 10% is expected as early-stage development constraints continue.

LITTLETON, Colorado, Dec 30 (Reuters) - For supporters of the energy transition, 2025 had plenty to complain about: the scrapping of U.S. clean energy policies, wind droughts ...

With developers continuing to add new capacity, including 9.2 GW of new lithium-ion battery storage capacity in 2024 through November 2024 and comparable levels of growth expected ...

The U.S. utility-scale energy storage market led the way, adding 1.5 GW/4 GWh of capacity in Q1 2025 for a 57% increase over the same period last year. The residential storage ...

According to the new "U.S. Energy Storage Monitor" developed by Wood Mackenzie and the American Clean Power Association (ACP), the American energy storage ...

As we wrap up 2025, the energy storage sector has experienced explosive growth. With the rapid expansion of renewable energy, storage has evolved from a supporting role to ...

Overall, July to September 2025 was the third best quarter ever for new solar installations. Solar accounted for almost 80% of new electrical generating capacity through ...

The scene is set for significant energy storage installation growth and technological advancements in 2025. Outlook and analysis of emerging markets, cost and supply chain risk, ...

The U.S. energy storage market delivered a record-breaking quarter in Q3 2025, installing 5.3 GW nationwide and pushing year-to-date additions past the total installed ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

The battery storage industry in the U.S. has grown in leaps and bounds in recent years, surpassing its most aggressive targets to become one of the largest new sources of ...

In 2025, capacity growth from battery storage could set a record as we expect 18.2 GW of utility-scale battery storage to be added to the grid. U.S. battery storage already achieved record ...
