The Electric Power Research Institute (EPRI) conducts research, development, and demonstration projects for the benefit of the public in the United States and internationally. As ...

As renewable energy adoption accelerates globally, the energy storage system (ESS) industry chain has become the backbone of modern power grids.

The Solar Energy Industries Association (SEIA) published a white paper outlining the industry group's vision for U.S. energy storage, setting a target to install 10 million ...

Our approach McKinsey's Energy Storage Team can guide you through this transition with expertise and proprietary tools that ...

Solar and storage are a dynamic pair, and together will form the backbone of a clean, reliable electricity system. Storage is critical to our nation's climate stability, energy resilience and ...

The application scenarios of the energy storage industry can be mainly divided into three categories: power supply side, grid side and user side: energy storage installed on ...

The energy storage industry is making significant progress in laying the groundwork for a domestic battery energy storage supply ...

The Risk Assessment Essentials for State Energy Security Plans was developed by DOE CESER with funding from the U.S. Department of Energy's State Energy Program in the Office and ...

The white paper, released Jan. 28 along with a guide to energy storage regulatory policies in each of the 50

states, discusses policy recommendations that would open markets ...

It provides a summary of each technology's supply chain, from the extraction of raw materials to the production of batteries and other storage systems, and an analysis of the vulnerabilities of ...

Energy storage (especially long-duration and multi-day storage) may be able to resolve both transmission security constraints and provide flexibility value to the grid

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy ...

China has unveiled an action plan to boost full-chain development of the new-energy storage manufacturing industry, aiming to expand leading enterprises by 2027, ...

China's industrial and commercial energy storage is poised for robust growth after showing great market potential in 2023, yet critical ...

As we navigate this energy transition, remember: The best energy storage industry chain investment plan isn't about picking winners - it's about powering the entire race.

Every five years ... in conjunction with the Secretary [of Energy] ... develop a five-year plan for integrating basic and applied research so that the United States retains a globally competitive ...

Cold storage design and construction is literally the foundation of the cold chain. A temperature-controlled facilities design can impact every facet of operations from energy costs to turnover ...

This energy sector assessment, strategy, and road map (ASR) updates the state of the energy sector in the Republic of Indonesia since the 2016 publication of Indonesia Energy Sector ...
