-----

Liquid air energy storage could be the lowest-cost solution for ensuring a reliable power supply on a future grid dominated by carbon-free yet intermittent energy sources, ...

As MIT's first vice president for energy and climate, Evelyn Wang is working to broaden MIT's research portfolio, scale up existing innovations, seek new breakthroughs, and ...

A massive, 1,116-page budget reconciliation bill the House passed early Thursday morning is expected to set off a rush to start construction of clean energy projects between ...

Unlocking its secrets could thus enable advances in efficient energy production, electronics cooling, water desalination, medical diagnostics, and more. "Boiling is important for ...

Giving people better data about their energy use, plus some coaching, can help them substantially reduce their consumption and costs, according to a study by MIT ...

Canada's biggest battery energy storage system went online ahead of schedule and under budget on a patch of industrial land just a few kilometres from the Six Nations of the ...

At the MIT Energy Initiative's Annual Research Conference, speakers highlighted the need for collective action in a durable energy transition capable of withstanding obstacles.

MIT engineers developed a membrane that filters the components of crude oil by their molecular size, an advance that could dramatically reduce the amount of energy needed ...

The Challenge: o Scalability of PSH projects, and whether small modular PSH has competitive advantages over alternative energy storage technologies Partners: MWH Consulting, Knight ...

Launch a pilot project to build renewable energy projects on brownfields. Strengthen EGLE's Renewable Energy Academy that provides technical assistance for local ...

Project cost cap. the handbook states that the entire sum of incentives for a project (SGIP and Investment Tax Credit (ITC) combined), cannot exceed the total installed energy ...

Trump's upcoming budget reconciliation bill could take aim at clean energy tax credits, meaning projects need to move on construction ...

MIT researchers developed a new fabrication method that could enable them to stack multiple active components, like transistors and memory units, on top of an existing ...

In MIT course 15.366 (Climate and Energy Ventures) student teams select a technology and determine the best path for its commercialization in the energy sector.

The California Public Utilities Commission (CPUC) recently finalized a decision, which set new rules for the SGIP Equity and Equity ...

Trump's sweeping budget bill guts clean energy tax credits, threatening EV, solar, wind and hydrogen growth while boosting fossil ...

The new Schmidt Laboratory for Materials in Nuclear Technologies (LMNT) at the MIT Plasma Science and Fusion Center accelerates fusion materials testing using cyclotron ...

Project Benefits Helps advance our state's and region's renewable energy goals. Energy storage projects support grid reliability and the integration of more clean energy into ...
