---

The U.S. energy storage industry will invest \$100 billion over the next five years to build and buy batteries made in the United States, ...

The enactment of the IRA, which contained significant new incentives for storage including availability of the investment tax credit and new manufacturing credits, helped stimulate growth ...

Zelestra's solar-plus-storage Spain offtake deal is "PPA 2.0", firm says IPP Zelestra and utility EDP's recent PPA deal for a solar-plus-storage project ...

ACP announced a commitment on behalf of the US energy storage industry to invest US\$100 billion in American-made grid batteries.

Today's investment commitment aims to advance a manufacturing expansion in the United States that could enable American-made batteries to satisfy 100% of domestic energy storage project ...

The energy capacity of new battery, wind, and solar projects that received approval climbed to 45GW this year, 96% higher than in 2024, according to data from ...

India's battery energy storage capacity will see a massive jump in 2026. Capacity is expected to rise nearly ten times from 2025 levels. This surge is driven by a significant number ...

India Energy Storage Projects: A recent report by the India Energy Storage Alliance (IESA) predicts a dramatic increase in India's battery energy storage capacity to 5GWh in ...

The U.S. energy storage industry is committed to investing \$100 billion in American grid batteries, including both capital for building ...

Energy storage is a critical part of U.S. infrastructure--keeping the grid reliable, lowering energy costs, minimizing power outages, increasing U.S. energy production, and strengthening ...

Accelerated by DOE initiatives, multiple tax credits under the Bipartisan Infrastructure Law and Inflation Reduction Act, and decarbonization goals across the public and private sectors, ...

Across the United States, battery energy storage is rapidly emerging from a niche technology into mainstream grid infrastructure. The growing attractiveness of battery energy ...

In this report, our lawyers outline key developments and emerging trends that will shape the energy storage market in 2025 and beyond.

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy ...

The U.S. energy storage industry will invest \$100 billion over the next five years to build and buy batteries made in the United States, the American Clean Power Association and ...

The global energy storage market is poised to hit new heights yet again in 2025. Despite policy changes and uncertainty in the world's two largest markets, the US and China, ...

U.S. Energy Storage Industry Commits to Buying American Grid Batteries Each year the demand for American-made grid batteries expands as the deployment of energy storage resources ...

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...
