---

Mainland China accounts for most of the global energy storage demand, driven in the near term by regional requirements for new utility-scale wind and solar projects to include ...

In this blog, we'll cover what is driving the unprecedented growth of the energy storage sector, address challenges the industry needs to navigate, and show how energy ...

In 2024, 91% of new renewable projects offered cheaper electricity than the lowest-cost, new-build fossil fuel alternative. The cost of battery energy storage systems for grid ...

In 2025, the commercial and industrial energy storage industry is set for substantial growth, fueled by global policy support, cost optimization, and ...

As we approach 2025, the energy storage sector is poised for significant growth, driven first and foremost by increasing demand for grid-scale energy storage solutions, ...

Rapid cost declines in lithium-iron-phosphate (LFP) technology, the pivot to >6-hour battery energy storage systems (BESS), and the accelerating electrification of transport ...

We must transition to clean energy solutions that drastically cut carbon emissions and provide a sustainable path forward. The synergy between solar PV energy and energy ...

In this Energy-Storage.news roundup, Hydrostor receives permitting approval for its California project, Hawaiian Electric is set to begin construction on ...

China's energy storage sector saw an annual increment of 1.3x in 2024, with total installed capacity reaching 73.76 Gw, according to Bian Guangqi, an official with the National ...

The energy storage industry's trajectory in recent years has been nothing short of remarkable, driven by increased customer recognition of these assets' critical roles in grid ...

That's why leaders from across the energy industry launched the U.S. Energy Storage Coalition to make storage a core part of America's energy strategy. Energy storage is truly unique in its ...

Startup Ecosystem: Five innovative startups in this sector are EPYR (renewable thermal storage), Emtel Energy USA (graphene-based ...

Energy storage can provide multiple grid services. It can support grid stability, shift energy from times of peak production to peak consumption, and reduce peak demand. Solar ...

Uncover Deloitte's latest insights on global energy storage and how digital technologies and market innovation are helping accelerate battery storage deployment.

Wind and Solar, for example, have relatively low operational costs but cannot provide a steady stream of energy, increasing the demand for storage solutions that capture ...

The New York Solar Energy Industries Association has recommended nine ways for the administration of New York City Mayor-elect Zohran Mamdani to speed solar and ...

Battery storage (with or without solar PV) can help businesses reduce energy costs by seven figures and utilities increase capacity and ...

Solar is Creating Jobs and Driving Economic Growth The Interstate Renewable Energy Council (IREC) has reported that 280,000 Americans work in solar, as of 2024. Over 10,000 solar ...
