How many DC buses can a multi-cabinet system have?

The DC bus is directly accessible on specific connection points (screws). The multi-cabinet solutions can have up to three DC buses which are connected in parallel from cabinet to cabinet via cables. The construction of the cabinets ensures high safety for personnel.

What is a CTO server & network cabinet?

CTO Server and Network Cabinet. The DeltaVTM Configure-To-Order(CTO) Server and Network Cabinets provide an off-the-shelf solution for faster project execution and reduced installation costs. CTO Server and Network Cabinets are factory tested and ready for installation in technical or IT rooms.

What is a CTO cabinet?

CTO Cabinets are designed to meet local building code and industry best practices to deliver proven functionality with minimal costs. The CTO Server and Network Cabinets offering comprises a range of pre-engineered solutions based on industry standard, pre-installed with 19" frame and AC power distribution.

What is included in a multi-cabinet system?

Power connections, share bus and master/slave cabling between paralleled cabinets are included with Multi-cabinet systems. By default, the DC connection (or DC bus) connects all units in parallel with copper bars resp. Additional high voltage cables for high voltage systems. The DC bus is directly accessible on specific connection points (screws).

Options include different thermal management systems for bays needing cooling, internal or external AC power panels, integrated AC-DC power systems, fiber panels, and plinths.
