Why should you invest in EV charging infrastructure in Vietnam?

Amid the booming electric vehicle (EV) movement in Vietnam, the demand for sustainable and safe EV charging infrastructure has become more urgent than ever. This presents both opportunities and challenges for investors and high-quality electrical equipment providers like BTB Electric.

Where are the charging stations located in Vietnam?

Geographical Distribution: Wide but Uneven The charging stations are most concentrated in Hanoi, Ho Chi Minh City, Danang, and Hai Phong, the country's economic powerhouses with high mobility demands. These stations are primarily installed in apartment building parking lots, shopping malls, gas stations, and office buildings.

How many charging ports are there in Vietnam?

The company has deployed over 150,000 charging ports nationwide, especially in 63 provinces and along 125 national highways and expressways. Since 2024, this network has been transferred to its subsidiary, V-Green, aiming to become Vietnam's "EVGO," specializing in professional and independent charging network operations and expansion.

Will EVs replace internal combustion engine vehicles in Vietnam?

A World Bank report predicts that EVs could replace internal combustion engine vehicles by 2035. To meet the target of 1 million EVs by 2030, Vietnam would need at least 50,000 charging stations with 800,000 charging ports. By 2050, that number would rise to 6 million.

Detailed analysis of electric vehicle charging station prices in Vietnam and the latest development trends, attracting the attention of investors.

To meet the target of 1 million EVs by 2030, Vietnam would need at least 50,000 charging stations with
