Did Trump increase tariffs on Chinese solar panels?

On March 4, the Trump Administration increased the existing tariffs on China by 10%, which includes solar panels and solar panel components. Tariffs on Chinese-made solar components are nothing new and, in fact, were imposed during Trump's first term and expanded by the Biden Administration in 2024.

How will Trump's tariffs affect the cost of going solar?

Let's start with the impact on the cost of going solar. On March 4, the Trump Administration increased the existing tariffs on China by 10%, which includes solar panels and solar panel components.

Could solar panels go out of business without a tariff?

Although most of the solar energy industry opposed the action, Suniva and SolarWorld argued that, without a tariff on solar cells, remaining United States solar manufacturers could go out of business. The ITC found that cheap solar panel imports were causing injury to domestic solar manufacturers.

What are China's solar tariffs?

Additionally, a 145% tariff has been imposed on Chinese solar products. These measures are expected to disrupt the supply chain and increase costs for solar equipment across the board. The U.S. heavily relies on imported solar components, with Southeast Asia supplying over 80% of its solar panels. The new tariffs are anticipated to:

In April 2025, the U.S. solar industry is navigating significant changes due to newly imposed federal U.S. Solar Tariffs. These tariffs average 37% on imported solar panels and 47% on ...

Announced on April 2, President Trump's so-called "Liberation Day" tariffs set a universal 10% baseline tariff on all imports, with much ...
