What is a 47U server rack?

47U server racks and floor standing data cabinets from Server Room Environments are one of the largest available and are designed to provide a complete and secure protective enclosure system for servers, IoT, Edge computing and networking devices. The 47U rack range includes budget and premium models which can be tailored for site applications.

How do I choose a 47U rack or cabinet?

When selecting a rack or cabinet there are several factors to consider. A 47U rack or cabinet can house equipment whose total height when placed into the rack is no more than 2.09m. Care therefore has to be taken when selecting a rack to make sure that the cabinet height is sufficient to house the IT server, networking peripheral or IoT device.

What is a 42U rack?

B. Standard Data Center For enterprise environments, the 42U rack has become the industry standard. With a usable height of roughly 6 feet, a 42U server cabinet provides enough room for rack servers, PDUs, cable management accessories, and additional infrastructure like KVM switches.

How do I choose the right server rack size?

Choosing the right server rack size is more than just ensuring your equipment fits. Rack size influences how many servers you can deploy, which models you can use, and how much room you'll have for cabling, power distribution, and cooling. A well-chosen rack also makes future hardware upgrades far easier.
