-----

This project aims to establish a strong foundation for BESS deployment in Indonesia through model-based analyses of grid impacts. Furthermore, it focuses on developing a tailored BESS ...

Jakarta. Singapore has granted five companies, including Adaro Solar International and Keppel Energy, the conditional licenses needed to bring Indonesia a step closer to ...

A 5MW battery energy storage system (BESS) pilot project has been launched by Indonesia's state-owned utility and battery manufacturer in an effort to transition away from ...

This energy sector assessment, strategy, and road map (ASR) updates the state of the energy sector in the Republic of Indonesia since the 2016 publication of Indonesia Energy Sector ...

Indonesia's targets of 400,000 electric cars and 2 million electric motorcycles by 2025 require substantial charging infrastructure development. Each fast-charging station ...

The programme will consist of 80GW of solar PV plants and 320GWh of battery energy storage systems (BESS) across 80,000 villages. The projects will comprise 1MW solar ...

PLN, EU, KfW, and SMI advance Indonesia's clean energy push with EUR6M support for pumped-storage hydropower in Sumatra and Java to boost reliability.

The new initiative features plans for 1 MW solar minigrids tied with 4 MWh of accompanying battery energy storage, to be deployed across 80,000 villages, alongside 20 ...

This study presents a renewable energy (RE) optimization study to model the pathway to achieve 100 %

carbon abatement, focussing on options for storage, using ...

Operated by the village cooperative Merah Putih, these solar-plus-storage mini grids aim to provide affordable, reliable power while reducing dependence on costly diesel ...

Indonesia has recently launched a 5 megawatt Battery Energy Storage System (BESS). The new energy storage system is a device that enables energy from renewables to ...

This project aims to establish a strong foundation for BESS deployment in Indonesia through model-based analyses of grid impacts. Furthermore, it ...

PLN and Indonesia Battery Corporation (IBC), the state-owned battery company, are working on another pilot project with a 5 MW energy storage system. PLN indicated that ...

The 2025-2034 Electricity Supply Business Plan aligns with Indonesia's National Energy Policy and General Plan for Electricity, and ...

Operated by the village cooperative Merah Putih, these solar-plus-storage mini grids aim to provide affordable, reliable power while ...

On May 26, 2025, the Ministry of Energy and Mineral Resources (ESDM) of Indonesia officially launched the Electricity Supply Business Plan ...

The Indonesia Solar Energy Outlook (ISEO) 2025 report highlights that solar energy growth in Indonesia has been slow compared to the targets outlined in PLN's National ...
