Will a battery energy storage system be built in County Offaly?

Co. Offaly, 6th November 2024: SSE has acquired the project development rights for a 120MW/240MWh grid-scale battery energy storage system (BESS) project in County Offaly from UK-based renewable energy company Low Carbon which, if approved for final delivery, could be constructed and operational by the end of the decade.

Which battery energy storage systems are available in Ireland?

The Kylemore Battery Energy Storage System in Dublin went into operation in 2023 and has the capability of providing 30MW of fast-acting storage. The South Wall Battery Energy Storage System went live in 2023 and has the capability of providing 30MW of fast-acting energy storage.

Are battery energy storage systems a 'great achievement' in Ireland?

ESB Networks described the project as a "great achievement for battery storage" in Ireland. Battery energy storage systems, often referred to as BESS, are regarded as a vital part of the Ireland's fledgling renewable energy sector and demand for them has never been higher.

Does SSE have a battery storage system in Ireland?

SSE has grown its secured battery energy storage system (BESS) pipeline in Ireland to 300MW with the acquisition of the 120MW/240MWh Thornsberry BESS project near Tullamore, County Offaly. Pictured is the company's 50MW battery storage facility in Wiltshire, England.

Horizon Offgrid Energy is a leading supplier of innovative energy storage solutions, specialising in meeting the requirements for grid reinforcement.

However, from next month, battery storage operators will be permitted to trade electricity on the all-Ireland wholesale market, opening a new source of supply in a move that ...

Without battery storage, you're essentially forced to sell your daytime solar generation at a loss, only to purchase expensive grid electricity once the sun sets and your ...

For Irish homeowners, this means batteries can predict cloudy weather and ensure sufficient storage for those overcast days. The AI also factors in your daily routines, ensuring ...

Most grid-scale battery-based energy storage systems use rechargeable lithium-ion battery technology. This is a similar technology to that used in smartphones and electric cars ...

LiFePO4 Batteries: Lithium iron phosphate (LiFePO4) batteries are a type of lithium battery known for their higher safety features, longer lifespan, and better thermal stability. ...

Battery Storage Our Battery Storage Ambitions We are at the forefront of developing battery systems, supporting the decarbonisation of Ireland's electricity system. We currently have ...

The Thornsberry battery storage system, located in County Offaly, is expected to provide grid-scale energy storage with a capacity of 120MW/240MWh, enough to power ...

SSE has grown its secured battery energy storage system (BESS) pipeline in Ireland to 300MW with the acquisition of the 120MW/240MWh Thornsberry BESS project near ...

Ireland's climate is surprisingly suitable for off-grid generation. A mix of solar PV panels and small wind turbines, supported by battery storage, can provide year-round coverage.

Ireland's climate is surprisingly suitable for off-grid generation. A mix of solar PV panels and small wind turbines, supported by battery ...

Battery Storage Our Battery Storage Ambitions We are at the forefront of developing battery systems, supporting the decarbonisation of Ireland's electricity system. We currently have ...

The Single Electricity Market in Ireland is set to see a battery energy storage system (BESS) boom into 2030| finds Cornwall Insight.

When Irish battery storage companies talk about "frequency regulation" or "ancillary services," they're basically saying their systems act like shock absorbers for the grid.

SSE has acquired the project development rights for a 120MW/240MWh grid-scale battery energy storage system (BESS) project in Ireland's Midlands from UK-based renewable ...

Under the deal, SSE Renewables has acquired the consented Thornsberry BESS project from Grid Systems

Services Limited, a developer of grid-scale battery storage projects ...

Battery energy storage can play a vital role in Ireland's progress towards its renewable energy targets The Lumcloon battery storage facility in Co Offaly, with the ...

January 1, 2026 Calculate your potential savings by tracking how much electricity you currently use during evening peak hours when solar panels aren't generating power. Most ...
