Is Brazil a good country for solar energy?

Brazil is one of the most advanced countries in Latin America in terms of the development of the renewable energy sector. The country has excellent levels of solar radiation, as it is in a latitude range in which the incidence of solar radiation is much higher than in the rest of the world.

How much wind energy will Brazil have by 2024?

Brazil was sixth in the global ranking of the Global Wind Energy Report 2023. According to the Brazilian Association of Wind Energy (ABEEólica),the expectation is that by 2024,Brazil will have at least 30 GWof installed wind energy capacity,considering only auctions already held and contracts signed.

Is Brazilian wind energy a primary energy source?

Brazilian wind energy has been growing rapidly,with the potential to be one of the largest primary energy sources in the near future. Since no offshore wind installations exist in the country,the onshore sector dominates the wind power industry. Brazil was sixth in the global ranking of the Global Wind Energy Report 2023.
