Can China and Laos collaborate on a solar power project?

In what is the first large-scale solar photovoltaic project in Laos, CGN will collaborate with more than 70 Chinese and Laotian enterprises to establish a benchmark for electricity cooperation under the Lancang-Mekong Cooperation framework. The clean energy base is a vital power source supporting China-Laos power interconnection.

How many solar power plants are there in Laos?

However, by the end of last year, only eight solar power projects and four biomass power plants were in operation, with an installed generation capacity of 116 MW, representing just 1% of the country's total electricity production. As of early 2023, Laos produced power from 76 hydropower dams, with another 43 still under construction.

Is renewable power gaining traction in Laos?

Renewable power generation is slowly gaining traction in the Lao People's Democratic Republic (Laos). However, the country of only 8 million people doesn't receive as much attention as its larger and more powerful fellow Association of Southeast Asian Nations (ASEAN) members, particularly Indonesia, Thailand, Vietnam and the Philippines.

On 28 October 2025 in southern Laos, the provincial government of Attapeu approved a 5 megawatt solar power project to be developed by South Korean firm SBIN Corporation. The ...

The initiative aims to establish a regional clean energy hub by integrating solar, wind, and biomass power. This solar farm directly ...

30KWh Outdoor PV Energy Storage Cabinet: Incorporating Highjoule (HJ Group)'s 20+ years of the cabinet design expertise, featuring compact design, high-integration, flexible installation, ...

In September last year, CGN and the Lao government signed an agreement to jointly build a comprehensive clean energy complex in the Lao provinces of Oudomxay, ...

Construction has commenced on the first phase of the one-million-kilowatt photovoltaic project at China General Nuclear Power Corporation (CGN)'s clean energy base ...

According to industry reports, the project inaugurated is Phase I of the CGN Northern Laos ultra-large solar facility. This initial phase alone boasts an impressive capacity ...

ASEAN member Laos has plans to increase renewable energy in its power mix, notably solar power buildout. However, it continues to rely on hydropower and coal-fired power ...

CGN Laos' 1 GW solar PV project: The China General Nuclear Power Group (CGN) has signed a concession agreement from the Government of Laos for phase I of its GW ...

Imagine being halfway through a wilderness camping trip when your devices die, or watching your outdoor solar battery storage system fail during a weekend cabin getaway. Traditional power ...

Located in the northern provinces of Oudomxay, Luang Namtha, and Phongsaly, the project is designed to create a comprehensive clean energy base integrating wind, solar, ...

(Yicai) Dec. 19 -- China General Nuclear Power Group, a state-owned atomic and clean energy developer, has kicked off construction at Laos' first large-scale photovoltaic power generation ...

The first phase of the project is expected to involve over 40 Chinese companies in manufacturing, construction, and engineering, along with more than 30 local firms in Laos.

Today, along the same stretch of the Ho Chi Minh Trail, a state-owned Chinese company has just finished constructing what is touted as the largest onshore wind farm in ...

In an era where renewable energy integration faces harsh environmental challenges, the PSO Outdoor Integrated Cabinet emerges as a game-changing solution for solar and battery ...

The initiative aims to establish a regional clean energy hub by integrating solar, wind, and biomass power. This solar farm directly supports Laos's national renewable energy ...

In Laos, there were no solar factories exporting to the U.S. during the first eight months of last year, but exports surged past \$48 million by August this year. Companies like ...
