Are battery storage systems generating revenue?

This has been reported by battery storage provider Tesvolt and its subsidiary Tesvolt Energy. Over several months, the outdoor storage system was tested in ten different customer projects. Those storage systems used exclusively for energy trading are already generating monthly revenues in the four- to five-figure range.

Should large-scale energy storage systems be connected to the medium- and high-voltage grid?

Distribution grid operators are receiving a large number of requests to connect large-scale energy storage systems to the medium- and high-voltage grid. This has been published by Bayernwerk Netz, Bavaria's largest distribution system operator, and Mitnetz Strom.

Why should you choose tesvolt energy storage systems?

TESVOLT energy storage systems are the economical choice for the most demanding applications. Made in Germany, in Europe's first ever gigafactory for stationary battery storage systems, in Lutherstadt Wittenberg. Quality, performance, and optimum interplay between the individual components set our storage systems apart from the rest

What types of energy storage systems are available?

From 10 kWh to 30 MWh outputs, connected to low or high voltage, on-grid or off-grid, in combination with solar, wind, hydro or combined heat and power sources - our broad product portfolio of industrial and commercial energy storage systems covers the full range of applications and can be individually adapted to your requirements.
