What is 230 kV transmission system in Batangas & Laguna?

The 230 kV transmission system in Batangas and Laguna area caters more than 3,100 MW total generation capacity of Calaca CFPP and other Natural Gas Plants (San Lorenzo, Sta. Rita, and Avion). From Tayabas SS, the 500 kV backbone also stretches to Dasmariñas SS which serves as a drawdown SS for the loads in the south of Metro Manila.

What is the transmission backbone of Visayas Grid?

The transmission backbone of the Visayas Grid extends from Allen Cable Terminal Stationin Samar,all the way to Nabas SS in Panay. This power delivery system comprises approximately 5,378 circuit kilometers of transmission lines. Figure 2.3: South Luzon Transmission Corridor 2 Page |1212

Where are power plants located in Metro Manila?

In the southern part of Metro Manila, the power requirements are being drawn from Dasmariñas 500 kV SS and power plants directly connected to the 230 kV system. Las Piñas is connected through a DC 230 kV radial line from Dasmariñas, while Muntinlupa has a four- circuit supply line from Biñan. 2
