-----

Energy storage systems for electricity generation have negative-net generation because they use more energy to charge the storage system than the storage system ...

Duke Energy has submitted an early site permit application to the U.S. Nuclear Regulatory Commission for a site near the Belews Creek power plant in North Carolina, the ...

Gov. Kathy Hochul directed the state's power authority to develop an advanced, "zero-emission" facility in upstate New York that she hopes will help create a clean, reliable ...

Gov. Kathy Hochul said the New York Power Authority will build a nuclear power plant in upstate NY to supply electricity for energy-hungry companies.

China is promoting further cost reductions in wind and solar power generation, creating more opportunities for the rapid deployment of ...

Duke Energy announced today its submission of an early site permit (ESP) application to the U.S. Nuclear Regulatory Commission (NRC) for a site near the Belews ...

The plan announced November 6 calls for more than 2 GW of natural gas-fired generation capacity, and 5 GW or more of nuclear power, to energize the 3,500-acre site. New ...

Philippine New Energy Development Inc. (PNEDI) is a dynamic and innovative energy company specializing in the development, construction, ...

The strength of NRG's generation fleet is in the diversity of our generation sources and power plants. Discover our power generation assets for a more sustainable energy future.

Governor Hochul directed the New York Power Authority (NYPA) to develop and construct a zero-emission advanced nuclear power plant in Upstate New York to support a ...

The increment of new energy power generation accounted for over 80 percent of the total power generation increment, with both the volume and proportion of new energy ...

A majority of all new generation capacity under development is for solar energy (55%), followed by wind (26%) and natural gas (11%). However, over two-thirds of the wind capacity is in the ...

We expect 63 gigawatts (GW) of new utility-scale electric-generating capacity to be added to the U.S. power grid in 2025 in our latest Preliminary Monthly Electric Generator ...

Renewable energy Examples of renewable energy: concentrated solar power with molten salt heat storage in Spain; wind energy in South Africa; the Three Gorges Dam on the Yangtze ...

The study first outlines concepts and basic features of the new energy power system, and then introduces three control and optimization methods of the new energy power ...

China is promoting further cost reductions in wind and solar power generation, creating more opportunities for the rapid deployment of renewable energy facilities in ...

Installed wind energy capacity increased nearly 16-fold between 2000 and 2010[22], and wind power generation has more than doubled since 2008 to contribute 3% of total U.S. electricity ...

Join millions of residential, public sector & business customers who use Constellation as their trusted electricity & natural gas supplier. Compare rates.
