-----

Explore key legal regulations on energy storage, including licensing, safety standards, grid integration, and policy trends shaping energy law today.

As an important first step in protecting public and firefighter safety while promoting safe energy storage, the New York State Energy Research and Development Authority (NYSERDA) ...

Energy storage resources have become an increasingly important component of the energy mix as traditional fossil fuel baseload energy resources transition to renewable energy ...

As the proportion of renewable energy infiltrating the power grid increases, suppressing its randomness and volatility, reducing its impact on the safe operation of the ...

On July 25, 2025, New York officially adopted updated energy storage safety codes based on the Working Group's recommendations, further cementing the State's commitment to safe ...

In recent years, electrochemical energy storage system as a new product has been widely used in power station, grid-connected side and user side. Due to the complexity of its application ...

Other states, such as Maryland, have taken legislative or regulatory action to incentivize deployment of storage in the state, but have not yet adopted specific permitting or siting rules ...

This rulemaking identified energy storage end uses and barriers to deployment, considered a variety of possible policies to encourage the cost-effective deployment of energy ...

Collaborative efforts between industry and government partners are essential for creating effective rules and

ordinances for siting and permitting battery energy storage systems as energy ...

A Sales Tax Exemption is key to making commercial energy storage projects financially viable, and would directly increase the number of energy storage projects that can be built in support ...

The New York State Energy Research and Development Authority (NYSERDA) submitted a Retail and Residential Energy Storage Program Implementation Plan (Plan), ...

Inner Mongolia Energy Group has started constructing a large-scale new energy storage power station in the Ulan Buh Desert, the eighth-largest in China, to better harness ...

A new bill, Energy Storage Tax Incentive and Deployment Act, was introduced in March 2021 for standalone ESS and offers similar tax credit benefits for certain renewable energy sources.

To address these issues, various rapid energy storage methods have emerged as ancillary services, enabling the storage of energy, relieving the pressure on integrating renewable ...

Executive Summary Codes, standards and regulations (CSR) governing the design, construction, installation, commissioning and operation of the built environment are intended to protect the ...

Power systems are undergoing a significant transformation around the globe. Renewable energy sources (RES) are replacing their conventional counterparts, leading to a ...

The Department of Energy Office of Electricity Delivery and Energy Reliability Energy Storage Program would like to acknowledge the external advisory board that contributed to the topic ...

The scope includes two categories: dispatch-controlled new type energy storage and self-used new type energy storage by power stations. The former one refers to the new-type energy ...
