What are outdoor telecom enclosures?

Outdoor telecom enclosures are structures designed to protect and house telecommunications equipment outside. They come with a range of options including cable management, thermal management, environmental protection, and integration. All these solutions and enclosure products can be custom-made. KDM relies on custom and standard NEMA standard telecom cabinets to protect their internal equipment.

Why is a custom telecom enclosure necessary?

Custom outdoor telecom enclosures from KDM are necessary because they help you constantly adapt off-the-shelf product requirements. KDM relies on both custom and standard NEMA standard telecom cabinets to protect their internal equipment. Our telecom enclosures are manufactured with the highest quality standards under stringent ISO 9001:2005 manufacturing & quality management system.

What is a rack in a telecom enclosure?

Racks in telecom enclosures serve the purpose of rerouting and leading cables to other enclosures or to each other. They are often adjustable, allowing personnel to place levels of the rack at different heights. Racks have various openings that have their specific functions.

Given that unpredictability that comes with outdoor plants, data sources, building orientation, and other use cases, NEMA broadband enclosures are manufactured to endure the elements and ...
