Should off-grid energy projects and power infrastructure expansions be supported by finplan?

The paper recommends the adoption of the FINPLAN tool for appraising off-grid energy projects and power infrastructure expansions. Off-grid energy projects particularly solar mini-grids, play a crucial role in electrifying remote areas with limited access to centralized grids.

Are off-grid energy projects a key role in electrifying remote areas?

Abstract: Off-grid energy projects particularly solar mini-grids, play a crucial role in electrifying remote areas with limited access to centralized grids.

How do financial parameters affect a solar PV-battery energy storage system (BESS) project?

The case study of a 20.46kWp Solar PV-Battery Energy Storage System (BESS) project highlights the impact of key financial parameters, such as interest rates and inflation, on project returns.

Can a hybrid solar PV/biogas/battery energy system provide power to distant areas?

Flavio Odoi- Yorke et al. examined the possibility of using a hybrid solar PV/biogas/battery energy system to provide power to distant areas in Ghana. The objective is to employ locally accessible renewable energy sources to reduce greenhouse gas emissions while achieving a Levelized Cost of Electricity (LCOE).
