How much does a data centre cost in Vietnam?

The report reveals that the average construction cost for a mid specification standard data centre in Vietnam is USD 6,935,600 per megawatt, an increase of 3.5% y-o-y (equivalent to VND 175,470,680,000 per megawatt).

Is Vietnam a good destination for data centre investors?

Vietnam continues to be recognized as an attractive destination for data centre investors. According to the Asia Pacific Data Centre Construction Cost Guide 2025 by Cushman & Wakefield, which covers 90 data centre clusters in 26 cities, Vietnam boasts some of the lowest construction costs in the Asia-Pacific region, second only to Taiwan.

How will Vietnam's telecommunications landscape change?

However, the landscape is poised to change since the Vietnamese government announced the Law on Telecommunications that eases processes around data localization and cancels foreign ownership caps for data and cloud providers to allow for foreign ownership in the country.

What is the National Data Centre project?

The Vietnamese government has also announced the National Data Centre Project to securely store government data as it advances towards robust digitalization in the public sector. These efforts not only drive the growth of pioneering businesses but also expand the capacity of data centers in Vietnam.
