Which server rack should you choose?
From small computer rooms to large data centres, IS-1 server racks are the first choice. Thanks to the flexible expandability - whether in cold or hot aisle containment systems - you can rely on maximum investment security. Regardless of whether it is a small or large data centre, the server hardware must be housed securely.

What is a IS-1 server rack?
The IS-1 server rack is specially designed for use in data centres with high heat loads and conditioned air(cooled,no dust in the air). It has perforated doors on both sides for horizontal ventilation. It offers perforated or closed doors depending on the type of cooling architecture selected.

How much does server colocation cost?
Single server colocation is popular for businesses seeking secure server hosting in a data center environment. Server colocation typically costs between $79 and $599 per month,depending on the provider and colocation cost requirements. Full rack deployment costs may include charges for space,power requirements,and bandwidth usage.

Where can I find the best server racks & cabinets?
RackSolutions has been manufacturing high quality server racks and cabinets for over 20 years. Whether you need a single rack at home or a thousand in a data center, you'll find the best that money can buy right here.
