Why do emergency lighting inverters need a centralized location?

With your emergency lighting inverters in a centralized location, maintenance and repair services are streamlined as workers only have to work on one system instead of checking and changing the batteries for every emergency lighting device. Request Information or a Quote from our Product Specialists

What is an emergency lighting inverter?

Emergency lighting inverters provide backup power for lights, signs, alarms, and other systems. Businesses can keep the lights on during any emergency or natural disaster such as fire, flood, storms, accidental power failures, and other mishaps.

Does Myers EPs offer emergency lighting inverters?

Myers EPS offers a full line of three phase emergency lighting inverters that provide up to 50kVA/kW of backup power for larger facilities and campuses. The Illuminator CIII is also available as an OSHPD rated unit - contact the factory to learn more.

Why should a business use a Myers lighting inverter?

Businesses can keep the lights on during any emergency or natural disaster such as fire, flood, storms, accidental power failures, and other mishaps. Many industries rely on Myers lighting inverters from Lighting Inverter Supply to provide the necessary power.
