---

The world's first skydive off the solar-powered electric plane SolarStratos has been completed successfully in western Switzerland.

Aiming to promote renewable energy to protect our planet's climate from the effect of greenhouse gases, the team's next big step is hoping to reach the stratosphere in 2022 with ...

This manual outlines procedures for the care and use of the Butler High Altitude Emergency Parachute System. Your parachute is an important piece of survival equipment. Proper care ...

ISI Solar engineered, procured, and constructed just outside of Parachute, Colorado. This solar farm produces 3 MWdc of power.

A Swiss pilot just blasted past 31,000 feet on pure sunlight, appearing to break the existing solar-flight altitude record and proving the future of aviation can run on clean energy.

High Altitude, High-Open, military-style parachute jumps. Spend up to 20 minutes flying under canopy. Jump from an altitude just below the stratosphere and feel the pop of your chute ...

This achievement marks a significant advancement toward the practical application of China's high-altitude wind power generation. China successfully conducted the ...

Swiss explorer Raphaël Domjan completed the world's first jump from a solar-powered aircraft after the plane soared to a height of ...

According to the official SolarStratos press release, the mission's latest feat used the highly modified solar

airplane powered by a 22 square-meter array of solar cells and ...

Fruity Chutes and High Energy Sports partner to provide scalable, U.S.-made drone parachute systems for enhanced UAV safety and reliability.

Swiss pilot Raphael Domjan on Friday made his first attempt of the year at setting a new aviation record: reaching an altitude of 10,000 metres in a solar-powered aeroplane.

This endeavor arrives at a pivotal moment as the aviation industry faces increasing pressure to reduce its carbon footprint. While electric aircraft are gaining traction for shorter ...

In 2022, the team aims to carry out a high-altitude flight powered exclusively by solar energy, seeking to reach the stratosphere with an altitude of 20,000 metres.

If this barrier is broken, the team hopes to go on and make a first manned solar-powered flight into the stratosphere, which at Switzerland's latitude begins at around 12,000 ...

According to the official SolarStratos press release, the mission's latest feat used the highly modified solar airplane powered by a ...

Examples are commando or reconnaissance missions, infiltrating the area of operation by: HAHO - High Altitude - High Opening or HALO - High Altitude - Low Opening. All INTERNATIONAL ...

In 2020, he performed a solar-powered parachute jump from SolarStratos. His life's work exists at the intersection of adventure and activism, silently proving that green ...

Skydive High offers extreme skydiving experiences around the world and is a division of the adventure travel company Incredible Adventures which has ...
