-----

What is thought to be Southeast Asia's single largest battery energy storage system (BESS) to date will be supplied to a solar PV-plus-storage project ...

2. Blue Solar Operating since 2006, Blue Solar is a Thailand company focusing on the renewable energy business. Its portfolio includes ...

Trinasolar brings to Thailand a full suite of PV and storage offerings, fresh from its global showcase at SNEC 2025 in Shanghai, the world's largest solar expo.

"Gas power plants running on green hydrogen under the most optimistic green hydrogen production costs would still generate electricity at more than three times the cost of ...

China has brought a 1 GW offshore solar power plant online off the coast of Dongying, Shandong province, combining PV with energy storage and aquaculture in what is ...

Rising electricity demand from electric vehicles and data centres has been reliably met with solar and batteries. The study concluded that prioritising solar and storage policies ...

Renewable energy plays a significant role in achieving energy savings and emission reduction. As a sustainable and environmental friendly renewable energy power technology, ...

The increased solar and energy storage targets could sustain the forecasted electricity demand increase from data centres and EV charging in the coming years.

Future of Solar Power in Thailand Solar energy in Thailand has crossed the line from a promise to a profitable imperative. Costs of ...

Despite significant progress in solar power deployment, its penetration in the electricity mix remains relatively low. This study employs process tracing to compare solar ...

China's Dongfang Electric built Thailand's first integrated floating solar plant at Ubol Ratana Dam in record time. Here's why it's cool: Local engineer Tirachai sums it up: "Our ...

Two recent hybrid hydro-floating solar energy projects jointly built by Chinese and Thai companies showcase an innovative blend of solar and hydroelectric technologies to ...

Trinasolar brings to Thailand a full suite of PV and storage offerings, fresh from its global showcase at SNEC 2025 in Shanghai, the world's largest solar expo. Highlights include ...

Battery energy storage systems (BESS) have emerged as a solution for mitigating the intermittent nature of solar and wind power with the rise of renewable energy. ...

By the end of 2024, the U.S. energy storage capacity is projected to reach 5.5GW, primarily concentrated in large-scale solar power plants and commercial/industrial electricity ...

What is thought to be Southeast Asia's single largest battery energy storage system (BESS) to date will be supplied to a solar PV-plus-storage project in Thailand by Sungrow.

GoodWe, a global leader in solar and energy storage solutions, has announced the successful commissioning of a 6.5 MW solar-plus-storage system at the Panasonic ...

The Ubolratana Dam hydro-floating solar hybrid power plant, located in Thailand's northeastern Khon Kaen province, integrates floating ...
