Investments in grid extensions and modernisation combined with energy storage facilities will be an essential prerequisite to integrating solar and wind technologies into the ...

In India, developers are moving quickly to pair renewables with advanced storage technologies. Companies like Envision and SUN Terra ...

Singapore could sit at the "core" of new regional electricity grids in Southeast Asia, according to research from Rystad Energy.

Highlights include evaluating the potential for floating solar on regional waterbodies, building resilience in urban energy, water, and food systems, supporting investment decisions ...

Global Energy Monitor's Global Solar Power Tracker and Global Wind Power Tracker currently catalog more than 28 GW of operating utility-scale solar and wind capacity across ASEAN ...

These efforts are generating anticipation to attract substantial foreign investment into a diverse range of solar, wind and energy storage projects.

In India, developers are moving quickly to pair renewables with advanced storage technologies. Companies like Envision and SUN Terra are planning multi-hundred-megawatt ...

Rising electricity demand driven by energy transition pressures and the expansion of AI is prompting Southeast Asian countries to explore nuclear energy as part of their long-term ...

Southeast Asian nations require stronger policy support to stimulate solar and wind development, creating a

more dynamic demand and supply for clean energy.

Four original case studies of solar power inverter systems with lithium batteries deployed in Southeast Asia--design choices, performance insights, and how storage cuts ...

Opportunities still exist for investors in Southeast Asia, particularly in the co-location of renewables projects with energy storage and Singapore's ongoing procurement of low-carbon ...

This study analyzes the factors that have facilitated Vietnam's recent rapid solar and wind power expansion and draws policy insights for other member states of the Association of ...

Blueleaf Energy gets BII backing for India and Southeast Asia expansion The financing will help fund projects such as utility-scale solar, wind and energy storage.

A supergrid, a vast interconnected power network, is envisioned to carry clean energy across Southeast Asia, but its execution has been complex due to diverging priorities ...

The Department of Energy (DOE) of the Philippines endorsed 17 power generation projects to the National Grid Corporation of the Philippines (NGCP) in June 2025, highlighting ...

Wärtsilä has delivered a number of projects in the region, including Singapore's first-ever pilot grid-scale battery energy storage ...

In this explainer, Dialogue Earth explores how various mainland Southeast Asian countries are engaging with wind power development. While Thailand has aggressively ...

This report assesses the opportunities and readiness of Southeast Asia's power sector to integrate variable renewable energy (VRE) - solar and wind - at scale and identifies ways to ...
