What is Telia & Ericsson doing in Tallinn?

Tallinn is responsible for developing and producing the latest and greatest products, which are delivered to customers worldwide. The enhanced collaboration between Ericsson and Telia is expected to have a significant impact, both locally and globally, on the Tallinn supply site and in the contribution to Estonia's export market.

How will Ericsson & Telia transform the manufacturing industry in the Baltics?

Ericsson and operator Telia are setting out to transform the manufacturing industry in the Baltics with the launch of the region's first enterprise 5G private network, located at Ericsson's Tallinn Supply Site.

Why does Ericsson have a supply site in Tallinn?

The supply site in Tallinn plays a strategic role in Ericsson's global supply chain footprint, accounting for nearly half of the company's new product introductions. Extensive research and development ensures product relevance, competitiveness, and scalability, which are critical factors in the successful ramp-up of new products.

Can 5G private networks accelerate industry-wide adoption?

By deploying advanced 5G private network technology, Ericsson and Telia believe they have opportunities to test new use cases and accelerate industry-wide adoption. They added that implementing this technology in a real-world scenario provides valuable practical insights on how to best implement and utilise 5G private networks.
