-----  
Are Chinese solar power inverters Rogue?

However, rogue communication devices not listed in product documents have been found in some Chinese solar power inverters by US experts who strip down equipment hooked up to grids to check for security issues, the two people said.

Are Chinese power inverters being used on solar panels?

U.S. officials have discovered undisclosed communication devices on Chinese-made power inverters that were being used on solar panels, Reuters reported today based on anonymous sources within the federal government. The inverters are devices separate from power sources like solar arrays or batteries.

Are Chinese solar power inverters connected to critical infrastructure grids?

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters connected to critical infrastructure grids across the country.

How many solar power inverters and batteries are Rogue?

Reuters was unable to determine how many solar power inverters and batteries they have looked at. The rogue components provide additional, undocumented communication channels that could allow firewalls to be circumvented remotely, with potentially catastrophic consequences, the two people said.

U.S. officials have discovered undisclosed communication devices on Chinese-made power inverters that were being used on solar panels, Reuters reported today based on ...

Over the past nine months, undocumented communication devices, including cellular radios, have also been found in some batteries from multiple Chinese suppliers, one of ...

Website: <https://trademarceng.co.za>

Over the past nine months, U.S. experts have identified these undocumented devices in solar power inverters and batteries from multiple Chinese suppliers during detailed ...

Energy Security: US experts uncover hidden communication tools in Chinese inverters, raising alarm over grid vulnerabilities and foreign control risks.

According to Reuters, two people familiar with the matter, say that U.S. experts, who strip down equipment to check for security issues, have found unlisted communication ...

U.S. energy officials have launched an investigation after discovering unauthorized communication equipment embedded within Chinese-manufactured solar power inverters ...

For months, experts examining renewable energy equipment imported from China have been quietly finding rogue components in solar inverters and ...

According to Reuters, two people familiar with the matter, say that U.S. experts, who strip down equipment to check for security issues, ...

Reuters published a story yesterday that seems alarming on its face -- Chinese manufacturers may be putting secret communication devices in our solar inverters.

US energy officials are reassessing the risk posed by Chinese-made devices that play a critical role in renewable energy infrastructure after unexplained communication ...

Using the rogue communication devices to skirt firewalls and switch off inverters remotely, or change their settings, could destabilise power grids, damage energy ...

For months, experts examining renewable energy equipment imported from China have been quietly finding rogue components in solar inverters and large batteries, two people familiar with ...
