-----

The charger-to-new energy vehicle increment ratio stands at 1:1.8, indicating that infrastructure development is keeping pace with the ...

State-owned power company China Datang Corporation put a 100-MWh energy storage station using sodium-ion batteries into operation in central China's Hubei province on ...

[Shenzhen, China - October 2025] - China has officially completed its first 100 MWh sodium-ion battery energy storage station, marking a milestone in the nation's clean-energy transition and ...

China just fired up a next-gen battery hub blending lithium and sodium in its latest energy leap. On Sunday, its first lithium-sodium hybrid energy storage station began ...

As of March 12, 2025, a one million-kilowatt photovoltaic power station in Qinghai, China, has transmitted over 100 million kilowatt-hours of green electricity to the grid since its inception. ...

In the context of the global energy transition from fossil fuels to renewable energy sources, China's legions of wind turbines and seas of ...

China's first large-scale sodium-ion battery energy storage station officially commenced operations on Saturday. The station will help ...

At the Qianjiang facility, the sodium-ion battery system will store up to 100,000 kWh of electricity on a single charge and dispense it to 12,000 households for their daily needs. At ...

Anhui Combine New Energy Technology Co., Ltd was founded in 2014, Trailblazing leader in renewable energy storage solutions. Focusing on construction machinery power battery and ...

China Huadian and PowerChina have completed the world's highest solar plant in Tibet, capable of generating 247 million kWh of electricity annually.

China's first large-scale lithium-sodium hybrid energy storage station has been put into operation, capable of powering hundreds of thousands of homes, as sodium-ion batteries ...

China just fired up a next-gen battery hub blending lithium and sodium in its latest energy leap. On Sunday, its first lithium-sodium ...

This project is the first 30kW / 100kWh Sodium Ion battery storage power station in the world. Our company has the most advanced technology, ...

The station was built in two phases; the first phase, a 100 MW/200 MWh energy storage station, was constructed with a grid-following design and was fully operational in June ...

“After completion, this project is expected to become the largest grid-side energy storage project in China.”

On September 24, the world's first 100 MWh-class digital energy storage power station--the 50 MW / 100 MWh digital energy storage demonstration project--successfully ...

Wuxi, China, August 6, 2024 -- Sineng Electric is spearheading innovation in the energy storage sector and has been chosen to provide its string PCS MV turnkey stations for ...

At the Qianjiang facility, the sodium-ion battery system will store up to 100,000 kWh of electricity on a single charge and dispense it to ...
