Are anti-dumping duties threatening battery installations in the US?

Battery installations in the U.S. are threatened by the imposition of anti-dumping, countervailing duties on anode materials. The supply chain for Active Anode Materials (AAM) is dominated by Chinese producers, with attempts to establish the full supply chain outside of China remains years away.

Are anti-dumping duties on active anode materials threatening battery installations?

Battery installations in the U.S. are threatened by the imposition of anti-dumping, countervailing duties on active anode materials. The supply chain for Active Anode Materials (AAM) is dominated by Chinese producers, with attempts to establish the full supply chain outside of China years away. From ESS News

Will a new antidumping/countervailing duties investigation affect lithium-ion energy storage and EV batteries?

A new antidumping/countervailing duties (AD/CVD) investigation could affect domestic manufacturing and deployment of lithium-ion energy storage and EV batteries in the United States.

Will Aam tariffs increase the cost of lithium-ion batteries in 2025?

The petitioners are seeking duties of up to 920% on AAM, which would significantly increase the cost of lithium-ion batteries in the country. In its ESS Price Forecasting Report, Clean Energy Associates forecast that containerized batteries will increase in price in 2025, primarily as a result of tariffs and AD/CVD duties.

While President Donald Trump's sweeping levies on foreign imports have captured global headlines, antidumping and countervailing duty (AD/CVD) investigations into Southeast ...

The U.S. Department of Commerce has announced a preliminary imposition of a 93.5% anti-dumping (AD) duty on Chinese active anode material (AAM) products--a key ...

Battery installations in the U.S. are threatened by the imposition of anti-dumping, countervailing duties on

anode materials. The supply chain for Active Anode Materials (AAM) ...

Battery installations in the U.S. are threatened by the imposition of anti-dumping, countervailing duties on active anode materials. The supply chain for Active Anode Materials ...

A new antidumping/countervailing duties (AD/CVD) investigation could affect domestic manufacturing and deployment of lithium-ion energy storage and EV batteries in the ...

The US PV market is undergoing major policy changes, with the most significant shift stemming from the anti-dumping and countervailing duties (AD/CVD) on PV modules and ...

From innovative battery technologies to intelligent energy management systems, these solutions are transforming the way we store and distribute solar-generated electricity. [PDF] Us outdoor ...

On July 17, the U.S. Department of Commerce revealed preliminary anti-dumping tariffs of 93.5% on active anode-grade graphite imports from China, a critical component in ...

US imports of various types of batteries and related parts for energy storage systems, electric vehicles, consumer electronics and other uses have soared this decade, ...

US Anti-Dumping Tariffs on BESS Components By Lucian Gavriluc, PE Executive Director, Energy Storage  
Published July 2025, E3 Consulting Services, LLC

More Challenges Ahead for Battery Energy Storage Systems: US Anti-Dumping Tariffs on BESS  
Components E3 Consulting Services

Antidumping investigation could more than double cost of U.S. EV battery, energy storage Anti-dumping, countervailing duties on battery materials could have serious effects on ...
