-----  
How can Lagos improve its energy supply & demand?

Commissioned by C40 Cities, Arup conducted an extensive study reviewing Lagos's current energy supply and demand, its projected future needs, and the potential of various renewable technologies. We recommended a suite of measures, including localised solar power generation, energy efficiency improvements, and battery storage solutions.

How much electricity does Lagos have?

Home to 18 million residents, Lagos has only 850-1,000 MW of installed capacity serving the national grid, which meets just 10% of the city's electricity demand. The remaining demand is being met by fossil-fuel generators, firewood, or individual renewable energy systems - such as solar panels and biofuel.

What types of energy systems are available in Lagos?

Green energy systems, wood and pellet stoves, heating and cooling systems, solar, wind and biomass energy systems. At Lagos. Green energy systems, wood and pellet stoves, heating and cooling systems, solar, wind and biomass energy systems. At Lagos.

What is the power sector in Nigeria?

Revised in November 2025, this map provides a detailed view of the power sector in Nigeria. The locations of power generation facilities that are operating, under construction or planned are shown by type - including liquid fuels, gas and liquid fuels, natural gas, coal, hybrid, hydroelectricity, nuclear, solar PV, wind and biomass/biogas.

3. Gezhouba Lagos Solar PV Park The 360MW Gezhouba Lagos Solar PV Park is located in Lagos, Nigeria. It is owned by Falcore Power and Energy. The Solar PV project is ...
