-----

NYCIDA closed its largest battery energy storage project to date, the East River Energy Storage Project, located on an industrial site on the East River in Astoria, Queens. ...

As renewable energy projects play a greater role in our national grid, storage and distribution of that energy are becoming critical to its performance. ...

The New York City Economic Development Corporation (NYCEDC) and NYCIDA announced the five BESS projects yesterday (23 April), which will be built by developer ...

Reliable engineering quality, safety, and performance are essential for a successful energy-storage project. The commercial energy-storage industry is entering its ...

Energy storage has become an integral aspect of the global energy transition, shaping the way we produce, distribute, and consume power. The proliferation of energy ...

The Department of Energy (DOE) Loan Programs Office (LPO) is working to support deployment of energy storage solutions in the United States to facilitate the transition to a clean energy ...

The 185 MW Kapolei Energy Storage project will help Oahu comply with Hawaii's requirements to shift from fossil fuels to 100% renewable energy sources by 2045.

Bondada Engineering has secured a Rs 627 crore order from AP TRANSCO to develop a 225 MW/450 MWh standalone battery energy storage system under the BOO model ...

Battery Energy Storage Systems Modernizing the grid with innovative solutions. Coffman is leading the way

towards a more sustainable and ...

Reliable engineering quality, safety, and performance are essential for a successful energy storage project. The commercial energy storage industry is entering perhaps its most ...

Battery energy storage deployment boosts grid reliability and lowers costs for consumers and business while supporting the renewal of American manufacturing.

Government Market News | Mary Scott Nabers Insights | Battery storage projects surge as utilities prepare for next grid era in 2026 | Battery storage projects nationwide are ...

Bondada Engineering Ltd has received a Letter of Award (LoA) from the Transmission Corp. of Andhra Pradesh Ltd (AP TRANSCO) for the development of a 225 MW/450 MWh ...

BEI Construction has the engineering, electrical and implementation expertise required on energy storage construction projects (BESS) and ...

From iron-air batteries to molten salt storage, a new wave of energy storage innovation is unlocking long-duration, low-cost resilience for tomorrow's grid.

The 185 MW Kapolei Energy Storage project will help Oahu comply with Hawaii's requirements to shift from fossil fuels to 100% renewable energy ...

MingYang Group in China has made the world's first hydrogen gas turbine, marking a major milestone in green energy production.

Our History Anza is home to solar and storage industry leaders who have firsthand experience with the challenges faced by procurement, solar and energy storage development, and ...
