What is China's Energy Storage plan?

The plan's target represents a significant scaling up, even for the world's leading adopter and producer of energy storage technologies. According to official National Energy Administration data from its recent 'China new energy storage development report 2025,' the country's installed base at the end of 2024 totalled 73.8GW/168GWh.

What is China's energy storage policy & regulatory roadmap?

The policy and regulatory roadmap is aimed at pushing China's installed base of large-scale energy storage - primarily lithium-ion battery energy storage systems (BESS) - to 180GW by the end of 2027.

What is the 'Special Action Plan' for new energy storage?

The 'Special action plan for large-scale construction of new energy storage (2025-2027)' was published last Friday (12 September), formulated jointly by the country's National Development and Reform Commission and National Energy Administration (NEA).

What is the scope of energy storage in the PRC?

" ??????????????????????????," People's Government of the PRC, 3 Jan 2023, at <https://> The scope includes two categories: dispatch-controlled new type energy storage and self-used new type energy storage by power stations.

India is rapidly emerging as a global hub for energy storage, driven by strong government support and a vision to achieve climate resilience and grid stability. At the heart of ...

Ever wondered why governments are suddenly playing Santa Claus for energy storage projects? Let's spill the tea: energy storage pilot subsidies are reshaping how we store ...

What are the government energy storage projects

Source: ASIACHEM WeChat, 5 January 2026 Shanghai Electric announced that Phase 1 of its Baicheng 100MW/600MWh vanadium flow battery (VFB) shared energy storage ...

Across the globe, numerous governments have embarked on ambitious energy storage projects aimed at creating sustainable energy futures. For instance, in the United ...

India's battery energy storage capacity is set to rise nearly ten-fold to around 5 GWh in 2026 from 507 MWh in 2025, reflecting a shift from tendering to execution of projects. ...

India Energy Storage Alliance forecasts a 10-fold jump in battery energy storage capacity to 5GWh in 2026, driven by major project execution.

China's National Energy Administration (NEA) has released the China New Energy Storage Development Report 2025, marking the first official and comprehensive government ...

Introduction This chapter supports procurement of energy storage systems (ESS) and services, primarily through the development of procurement documents such as Requests ...

The financing mechanisms for onsite renewable generation, energy storage, and energy efficiency projects include a spectrum of options ranging from traditional to specialized.

In terms of application, equipping energy storage in renewable electricity generation projects is the main application field for new type energy storage, with a cumulative installed ...

A number of compressed air, flow battery and sodium-ion battery energy storage projects have started operations, diversifying technological development in the sector, ...

Accelerated by DOE initiatives, multiple tax credits under the Bipartisan Infrastructure Law and Inflation Reduction Act, and decarbonization goals across the public ...

Government financial incentives Several federal government tax credits, grants, and loan programs are available for qualifying renewable energy technologies and projects.

The policy and regulatory roadmap is aimed at pushing China's installed base of large-scale energy storage - primarily lithium-ion battery energy storage systems (BESS) - to ...

Technological breakthrough and industrial application of new type storage are included in the 2023 energy work of the National Energy Administration (NEA).2 Energy ...
